

Solidare®

A one of a kind shadow bringer

Solidare®-system

A one of a kind shadow bringer

Solidare, a one of a kind shadow bringer. Do you have a patio roof, but no sun protection? Looking for a complete pergola awning? Or perhaps even an entirely freestanding awning? Solidare is the solution. The truly exceptional feature of the Solidare is that the fabric is guided using the same zipper technology made popular by the SolidScreen.

- ☐ Fabric completely sealed around
- ☐ Fabric without sagging sides
- ☐ Fabric which sags considerably less, even in larger systems
- ☐ No light ingress between the fabric and side guide

The Solidare® family

The result of many years of development experience

A family with a history. Solidare is the result of many years of experience and innovation in the development and manufacture of professional terrace awnings. Solidare's roots can be traced back to previous sun protection products. In 1995 we launched a conservatory awning called Summerlight, which was the forerunner of the Solidare-system. This type of conservatory awning was later also incorporated in the Cubola (2010). In 2009 we launched the SolidScreen, the other branch. And all these developments have finally led to the birth of the latest member of the family, the Solidare-system. This is a pergola awning combined with the zipper technology of our SolidScreen-range. History repeats itself. Thanks to its unique design, the Solidare can be installed as either a terrace awning, pergola awning or freestanding awning. The development of Solidare have made it our best-selling terrace awning. And we trust that it will remain so for many years to come.

Solidare® Conservatory awning

Solidare Conservatory awning,

This is the core element of the Solidare-system, available in two versions. It is the ideal option if you already have a patio roof, but no sun protection. The Solidare Conservatory awning both complements and enhances the sense of outdoor living. It is suitable for both, mounting to the patio roof or installation beneath it (Verso). Solidare's high quality aluminium profiles and zip-guided fabric make it windproof, highly durable and sturdy.

“Conservatory or Verso?”

In addition to Solidare Conservatory (left), we have Solidare Verso (right). The two products are almost identical, but for a few details. The main difference is that the Solidare Conservatory is attached on the patio roof, while the Verso (which stands for the opposite side) is installed beneath it. Each of these two methods of installation have their own particular pros and cons. However, the two products share the unique characteristic of preventing any ingress of light between the Solidare's front profile and the gutter (picture) when opened.

Verso nevertheless creates an entirely different ambience to the Solidare Conservatory. The entire surface of the fabric remains visible, when seated under the patio roof. On the other hand, the roof fabric excludes the heat more effectively. When the Verso is opened, spotlights are no longer visible through the extended fabric. One of the added advantages is that the fabric suffers less exposure to the elements, and therefore requires less maintenance. The choice is up to you.

Solidare® Pergola

Solidare Pergola awning,

A combination of Piazzola and Solidare. This is the ideal ready-made solution for anyone who lacks a patio roof, but is keen to have one installed. It is highly suitable for wall-mounted installation, thereby adding a little outdoor space to your existing living space, without the need for costly structural modifications. Solidare Pergola's high quality aluminium profiles and zip-guided fabric make it windproof, highly durable and sturdy.

“Bring a little of the Outdoors inside”

The fact that you are actually reading this, implies that you enjoy the Outdoor life, as do we ourselves. And while everyone experiences this feeling in their own particular way, it can generally be defined on the basis of the same key factors: nature, good company and enjoyment. Furthermore, these should preferably be combined with a certain degree of comfort and convenience. Solidare Pergola brings this feeling home to you. Or rather, to your home. The fact that it is wall-mounted, enables you to add a little of the Outdoors to your living space. You can more or less create an extra room according to your own requirements. Furthermore, it provides added ambience and protection. And from now on, the Piazzola (our pergola awning) can also be combined with the Solidare-system. This is a stylish shade bringer that makes Outdoor life so pleasant.

Cubola® Solidare®

Cubola Solidare,

A combination of Cubola and Solidare. This luxurious freestanding pergola awning can be installed (almost) anywhere. Lend your garden a little extra living comfort and enjoy Outdoor life whenever you choose. The Cubola Solidare is freestanding, but can also be wall-mounted. Furthermore, it can be linked to meet your needs. Made of high quality aluminium profiles and zip-guided fabric, Cubola Solidare is windproof, highly durable and sturdy.

“A combination of luxury and strength”

Cubola, our modern freestanding awning, is named after ‘cubo’, which is the Italian word for cube. The name does relate directly to its appearance, as the Cubola is either square or rectangular, and has four square legs.

Thanks to its ingenious design, this unique awning can be almost effortlessly incorporated in any home environment. Cubola’s adjustable corner pieces allow it to be opened in a diagonal or horizontal position, and everything in between.

Cubola is now also available with the Solidare-system. This is a further innovation of an already innovative awning. It combines the luxury of a Cubola with the strength of the Solidare.
